

## R&D Engineers (Mechanical/Electrical)

**At Liftra, we are looking for new engineers to develop state-of-the-art solutions for lifting and transportation equipment for the wind turbine industry.**

Liftra provides machinery and equipment for handling wind turbine components. We continue to set new standards in the industry, and we have many innovative projects on the drawing board – which is why we need even more talented engineers.

If you possess a bright mind, are able to keep track of multiple projects, thrive in a fast-paced environment and finish assignments on time – you will fit right in at Liftra.

### **At Liftra, you will need:**

- Your technical knowledge from the university – including in-depth understanding of design and calculations of strength as well as insight into designing mechanical, electrical and hydraulic systems.
- Solid skills in ANSYS and 3D CAD – preferably SolidWorks.
- A natural drive, high spirits and the ability to cooperate on projects.

### **Your responsibilities at Liftra will include:**

- A-to-Z development – follow projects through from specification and concept to final implementation of the product.
- Ensure that projects comply with our internal standards and procedures.
- Coordinate with our Supply Chain on choice of suppliers and solutions.

If you have any questions about the position, we encourage you to contact Erik Kristensen, our Head of Projects, on tel. +45 5217 5002. If you wish to apply for the job, please send your application and CV to [tls@liftra.com](mailto:tls@liftra.com).

Salary and employment terms are negotiated individually. You will start as soon as possible, although we are willing to wait for the right candidates.

### **About Liftra**

Liftra develops and manufactures transportation, lifting and installation equipment for wind turbines. Among our customers are many of the well-known global wind turbine manufacturers. Liftra is an engineering company founded in 2003, and we have grown steadily ever since. In 2013, we were awarded “Ingeniørens Produktpris” for our Self-Hoisting Crane, and in 2016 we were voted entrepreneur of the year in northern Denmark.

We are headquartered in Aalborg, Denmark, where about 40 colleagues are eager to work with you. Additionally, we have office space and production facilities in the USA, China, Spain and Poland. In total, Liftra counts about 110 employees.

If you are interested in other positions at Liftra, keep an eye on [our career page](#).
